

## LIST OF PAPG (north) EVENTS from March 2011-November 2011

Date	Event	Topic	Remarks
20 <sup>th</sup> March 2011	PAPG Field Excursion	Central & Eastern Salt Range Thrust System	The aim of the Field trip was to highlight certain structural features, presence of extensional faults in compressional regime, shear faults and structural offsets, subsurface behavior of salt range and its reversals towards east and stratigraphic truncations which are another very peculiar phenomenon of the area.
29 Jul 2011-31 Jul 2011	Bara Gali Conference	"Petroleum Geology Symposium"	Three days Petroleum Geology Symposium at Bara Gali Sumer Campus of University of Peshawar in the vicinity of Galiyat North Pakistan 29th to 31st July 2011 aiming to address the Key issues with the regional understanding of the Sequential Development of the Fractures, its implication and importance in the Hydrocarbon Exploration with the help of advanced FMI-DSI-UBI tools, in order to enhance the reservoir production in terms of oil and gas exploitations with emphasis on the development and importance of the Fractures in "Shale Gas Reservoirs".
31 Jul 2011	Bara Gali Conference	Petrophysical Interpretation Training	One day practical workshop was convened on petrophysical interpretation with emphasis on calculation of net pay, Porosity, Sw.

<p><b>24 Sep 2011- 25 Sep 2011</b></p>	<p><b>Bahria University Islamabad Technical Workshop</b></p>	<p><b>“Hydrocarbon Exploration using Seismic Techniques”</b></p>	<p>The overall objective was to introduce Geophysicists and Geoscientists with seismic applications including data Acquisition Processing and Interpretation in exploration. Fold and thrust belt data was used in the workshop to develop understanding of interpretation in compressional regime. Practical exercises involved understanding of the main techniques in the seismic section interpretation and precise structural contour mapping.</p>
<p><b>14 Oct 2011-16 Oct 2011</b></p>	<p><b>University of Peshawar Technical Workshop</b></p>	<p><b>“Well Log Analysis”</b></p>	<p>This 3-day petrophysics Workshop will focus mainly on open hole data acquisition and interpretation. The course will cover all the basics of log data acquisition and interpretation. New high technology tools will also be reviewed along with the applications of these tools. Practical Exercises will be performed using real log data. This will help to consolidate the participants’ understanding of the topics presented. The workshop will give good working knowledge of open hole log interpretation and computation of important reservoir parameters such as porosity, lithology, shaliness and water saturation.</p>
<p><b>22 Oct 2011</b></p>	<p><b>Punjab University Technical Workshop</b></p>	<p><b>Play Fairway Analysis</b></p>	<p>This exercise-rich course will touch on all aspects and fundamentals of petroleum systems and how they apply to an explorationist’s evaluation of a play or prospect. Play-based exploration reflects a fundamental shift in focus, wherein plays, and not prospects, are not the basic unit of exploration</p>

<b>Last week of Oct 2011or Nov</b>	<b>Technical Lectures for Professionals</b>	<b>Being finalized</b>
